

INDIA'S BIGGEST RANGE OF ENGINE VALVES

Nex tech[®]
ENGINE VALVE

IATF 16949-2016
CERTIFIED COMPANY

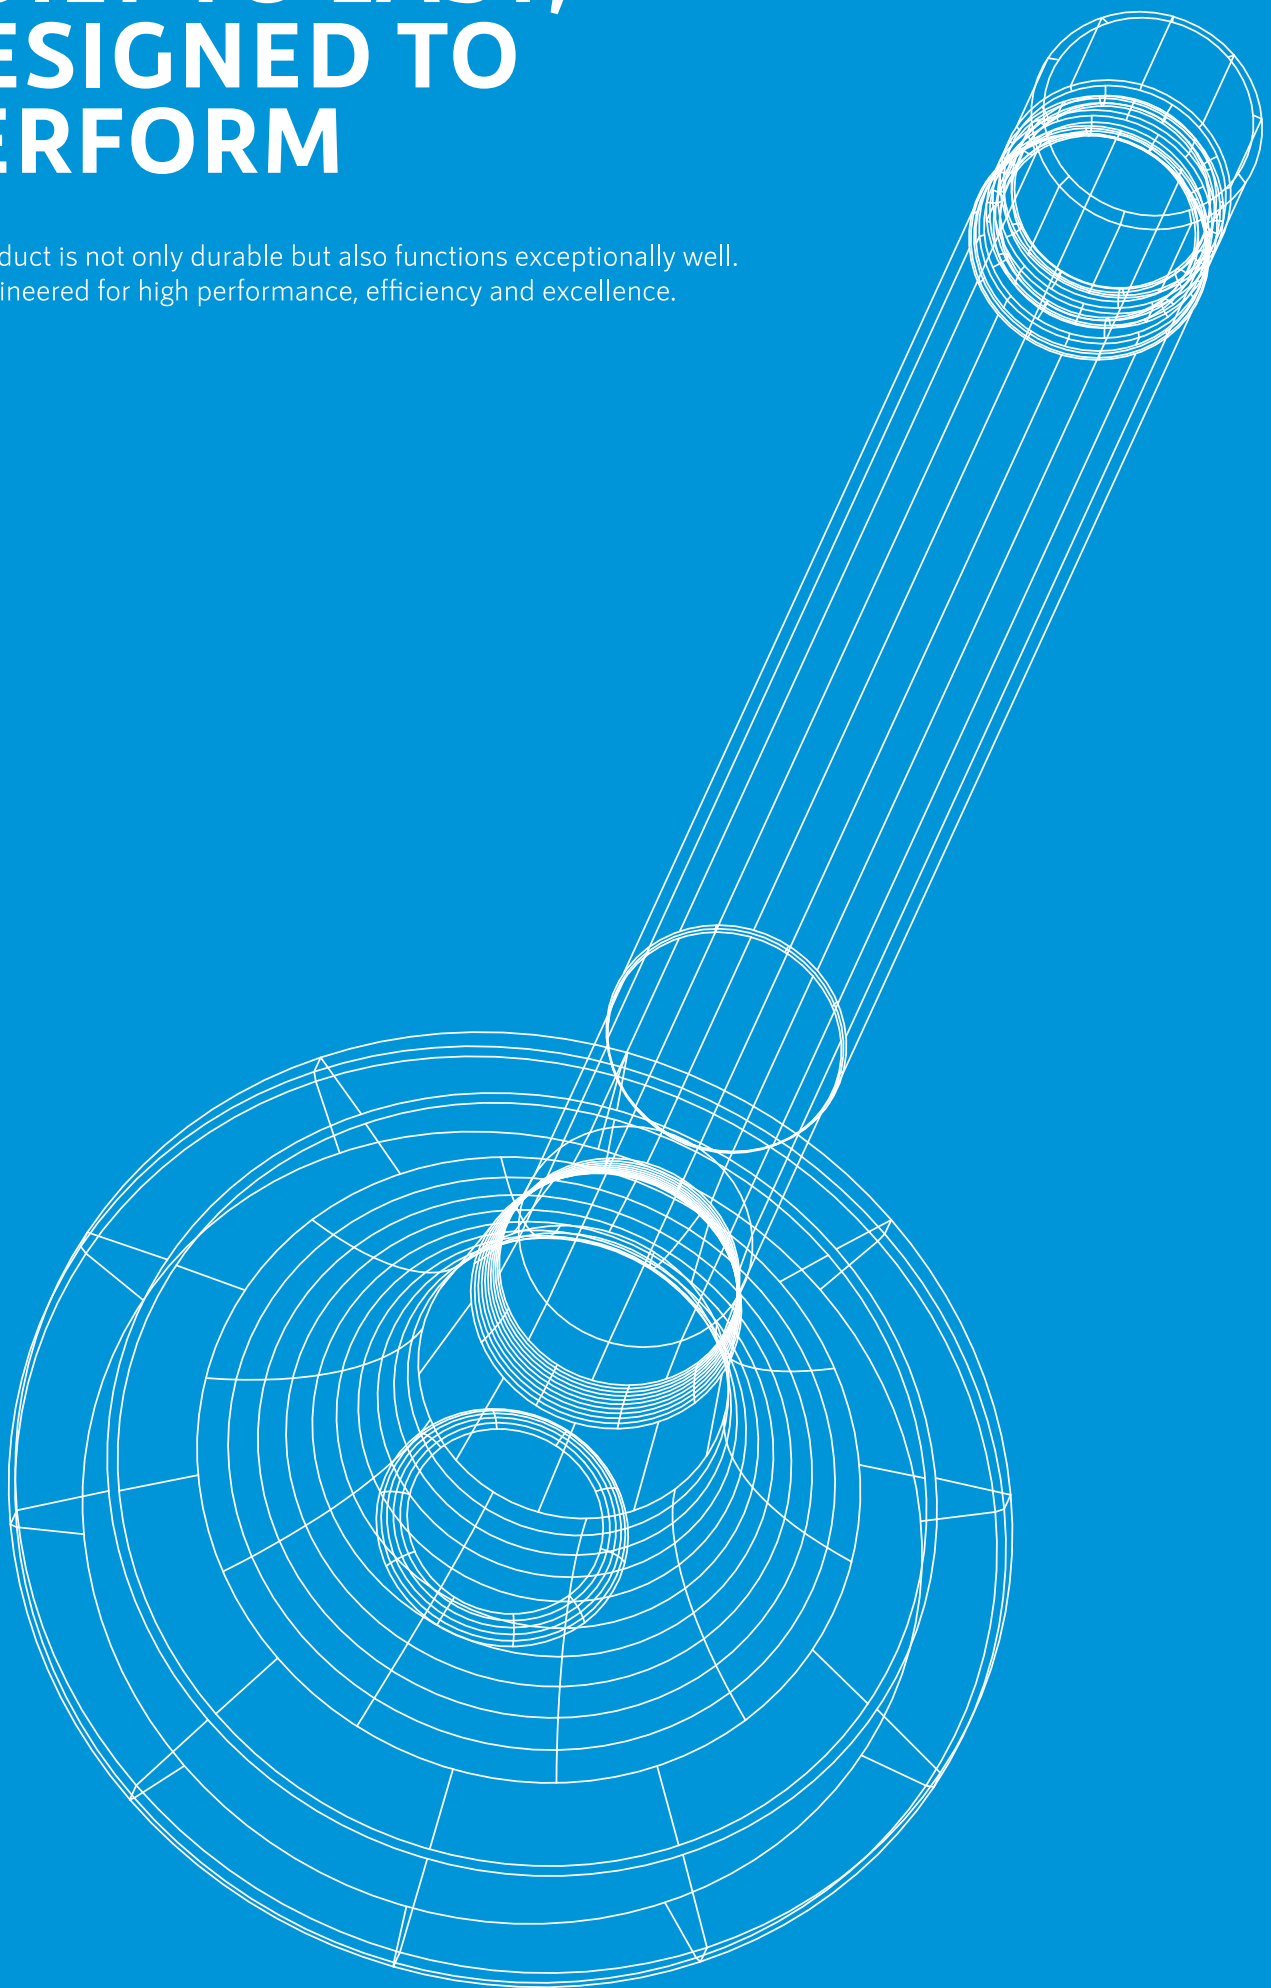

Manufacturer & Exporter of All Types of Engine Valves for Internal Combustion Engines

PART LIST

BUILT TO LAST, DESIGNED TO PERFORM

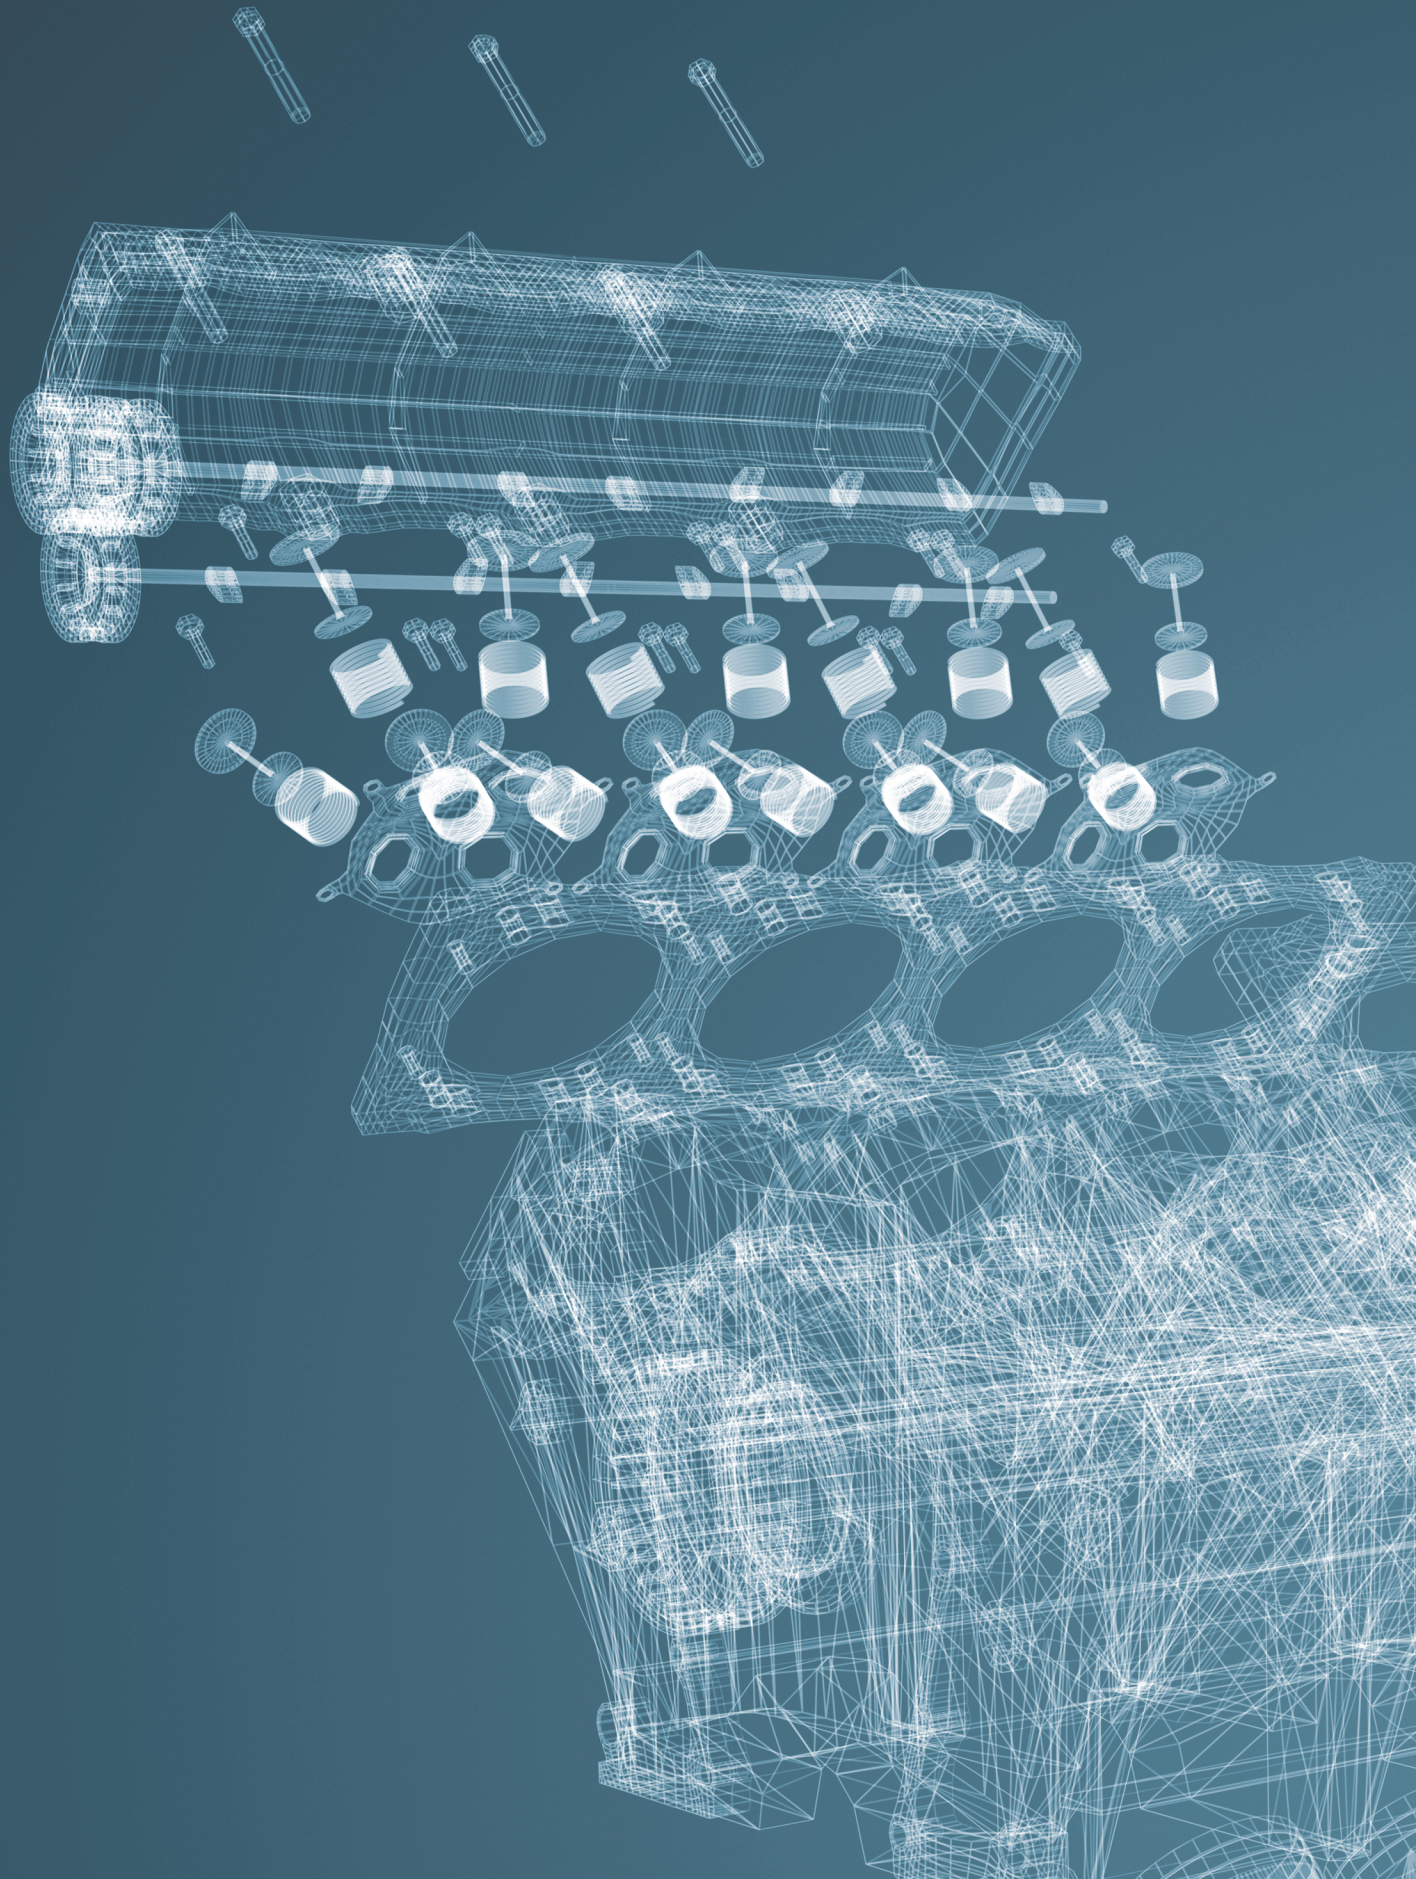

The product is not only durable but also functions exceptionally well.
It is engineered for high performance, efficiency and excellence.

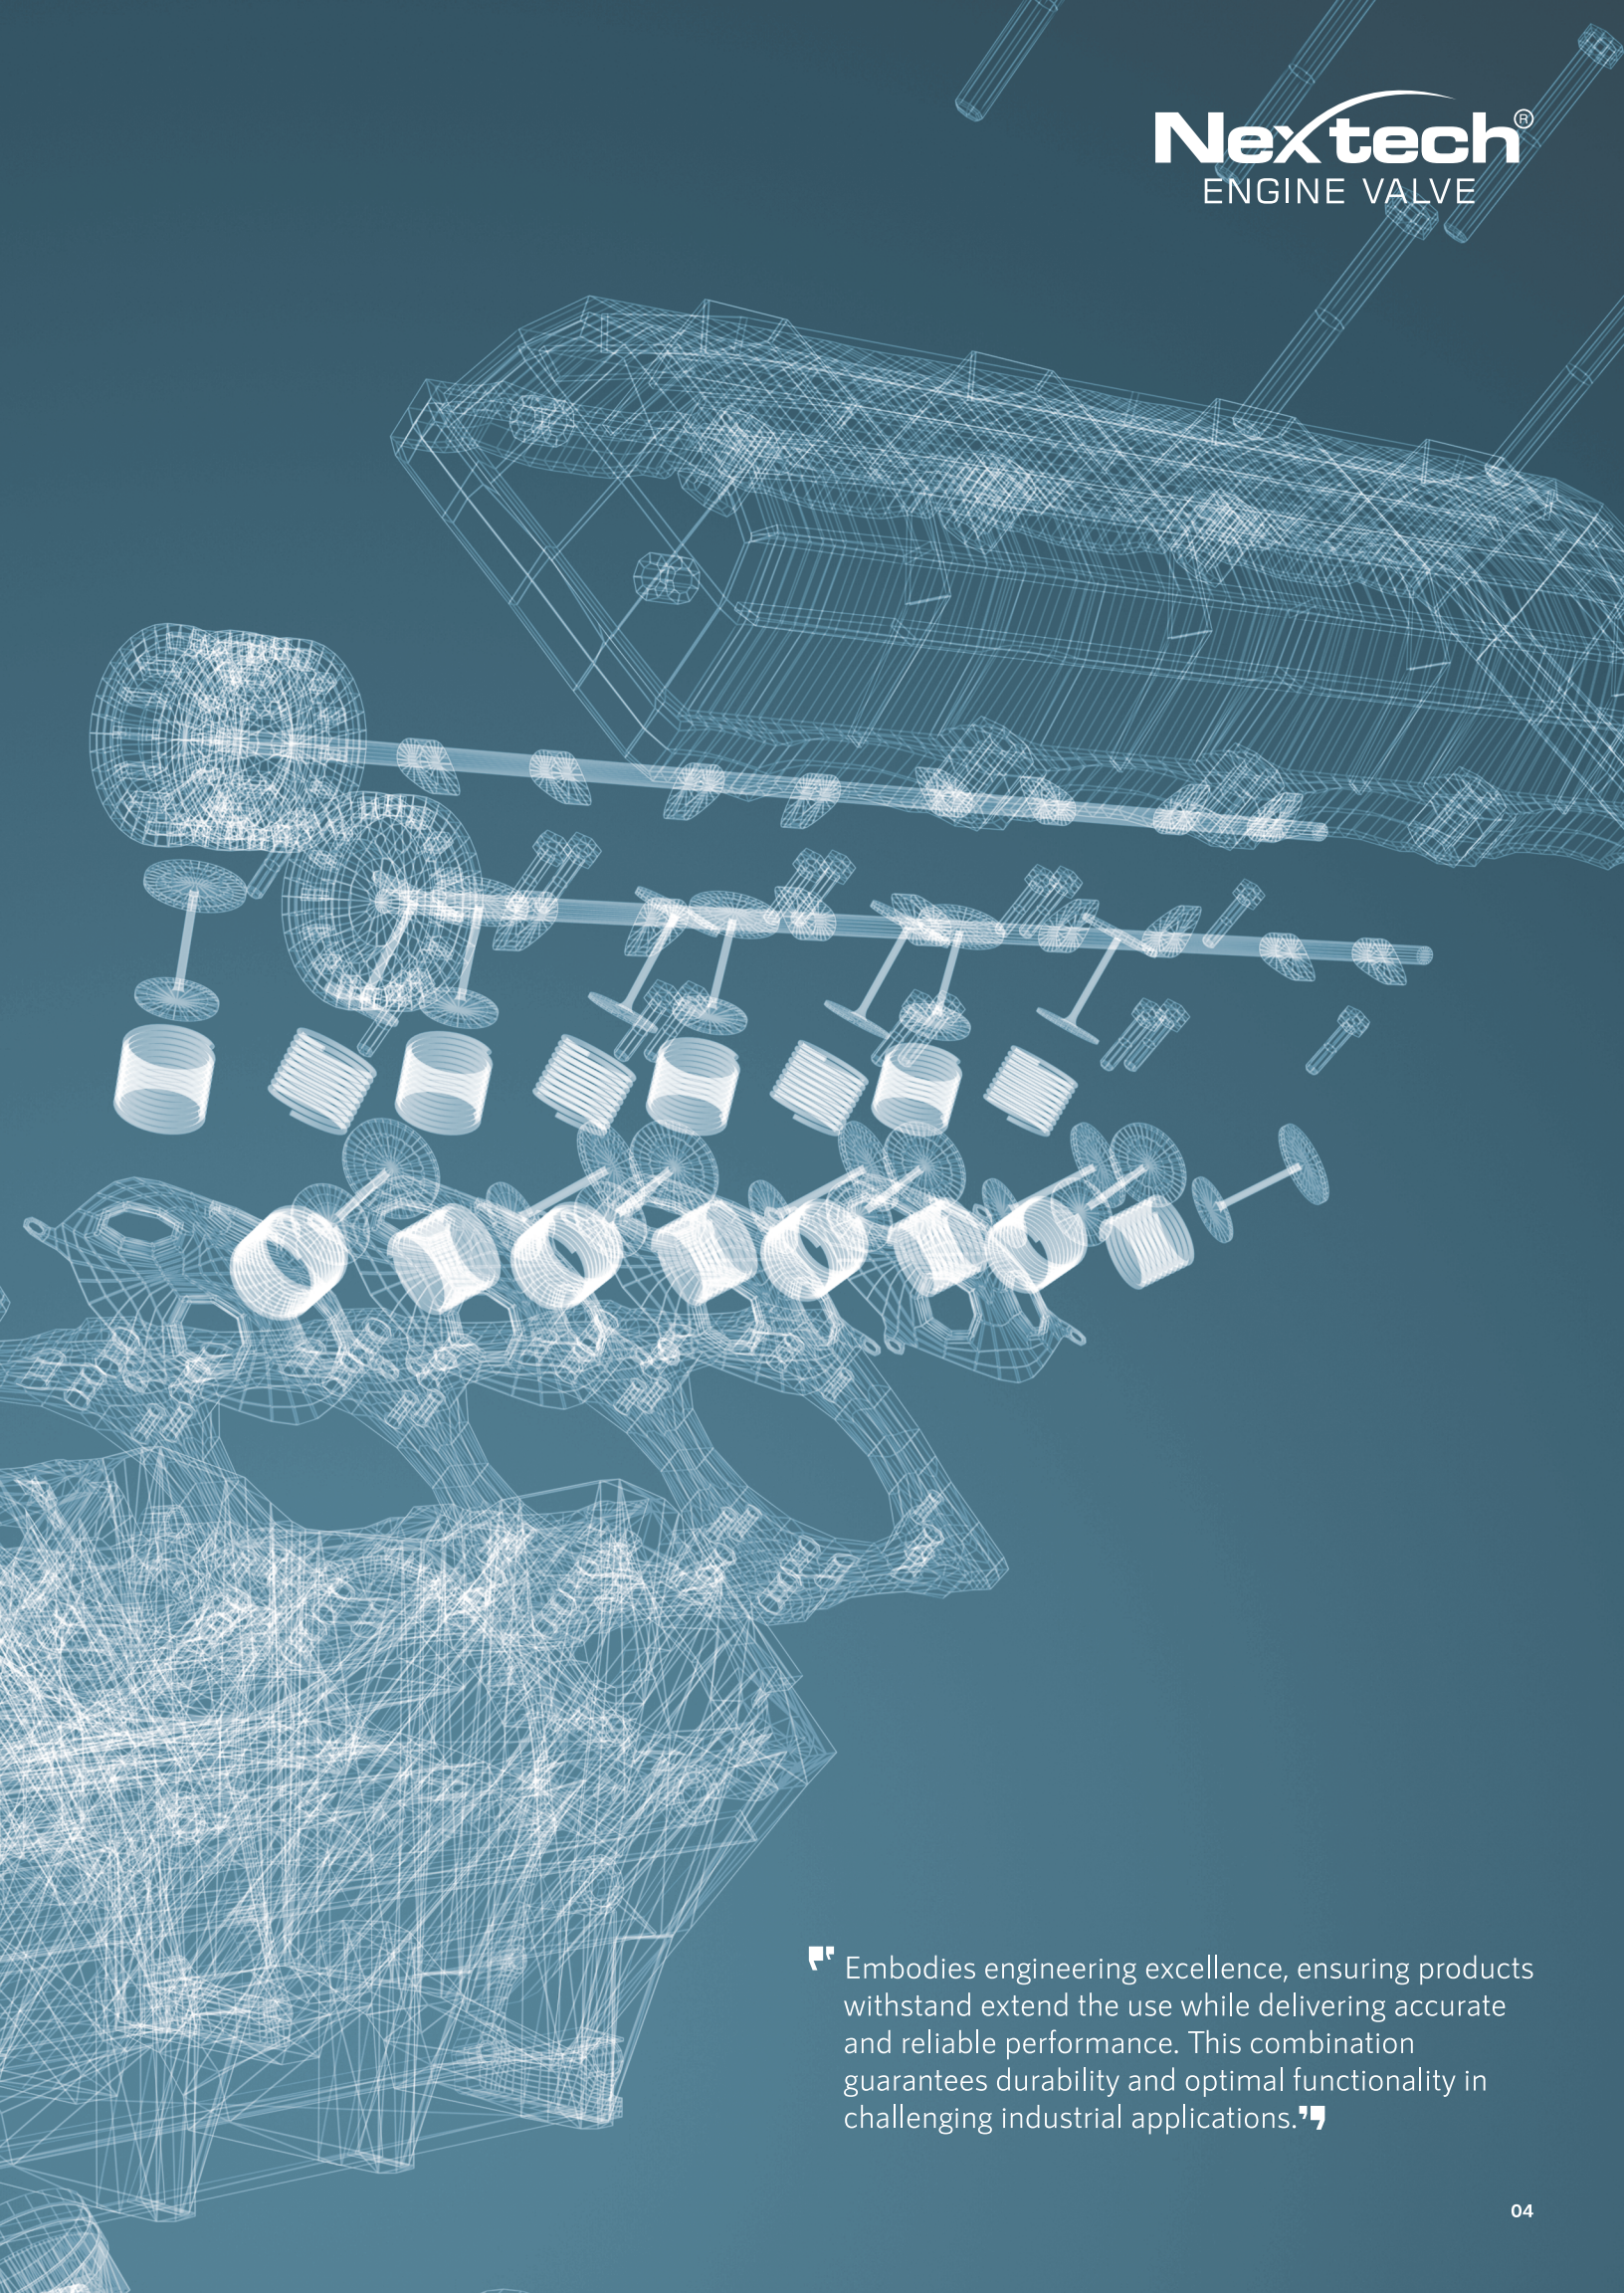

Looking for a one-stop supplier who is specialised in Engine Valves for Internal Combustion Engines? Your decision is right.
WHY NEXTECH?

New Advance Technology Manufacturing Unit.
Efficiency and Accuracy is our goal and focus.
Xtra move to satisfy our customers with competitive pricing offers.
Transparent business which helps us to build new and ongoing businesses for long time.
Eager and ready to answer any challenges for new development and projects.
Confidentiality and timely delivery are main things we do not compromise.
Hours of happiness for no rejections and constant regular supply.

**BUILT FOR LONGEVITY.
DESIGNED FOR PRECISION
PERFORMANCE.**

“Embodies engineering excellence, ensuring products withstand extend the use while delivering accurate and reliable performance. This combination guarantees durability and optimal functionality in challenging industrial applications.”

Our Company

Nextech Industries Pvt. Ltd., on the leading edge of advance technology, is engaged in manufacturing of engine valves for internal combustion engines. We are an IATF 16949-2016 certified company operation in steps with the advances of CNC technology, automated systems and advance manufacturing processes and techniques.

Founded and managed by experienced engineering professionals to cater the ever growing needs of the automobile industry and engineering industry worldwide, Nextech along with manufacturing of high-quality engine valves also design and develop valve as per customized requirements. The excellent infrastructure and high-quality team have helped the company to increase its range of products.

Nextech strongly emphasises on teamwork, combined with research and development, enables us to achieve a competitive advantage and continually create innovative solutions to meet the market needs. We have a large team of experienced engineers, working closely with our suppliers and keeping track on technology trends. We achieve competitive advantage through partnership with our customers and suppliers alike.

At Nextech, we take great pride in our quality achievement and exceptional customer services. We have particularly enjoyed our excellent sales for manufacturing all types of engine valves for internal combustion engines.

Nex tech
1008-0425

Our Health and Safety Policy

Nex tech firmly believes in its workplace being safe from hazards, and wants its employees to work in an injury-free environment, produce safe and accurate products, commit to pollution prevention, and protect the natural environment.

A micron is a dimension approximately one 80th the diameter of a strand of human hair. At Nex tech the standards of our work are measured within microns.

Our People

We believe in enhancing our products, by enhancing our operational methods and through ongoing, invest in both our people and machinery. We have a large team of experienced engineers, working closely with our suppliers and keeping track of trends in technology.

Our Values

To continuously improve our products and services, we believe that a perfect understanding of the clients need is of crucial importance and also adhere to the concept of corporate social responsibility.

INNOVATION IN EVERY VALVE

Our Brand

Nextech Industries Pvt. Ltd. stands at the center of the heart for all types of Engine Valve (Internal Combustion Engines) with an annual turnover of more than 300 crores recorded by our Group of companies (US\$ 3000 Million). The group experience in providing manufacturing services extending from engineering components to all sort of Engine Valves for internal combustion engines having mastery of its products and development. Nextech Industries Pvt. Ltd. having in-house facilities which help our customers to be free from all worries, product is made under one roof with latest technology and supervision.

Our name NEXTECH is not only the brand name for Domestic and International Market but a name for perfection and honesty in the business for Engine Valves, so our OEMs & Aftermarkets customer choose NEXTECH, we focus on our product quality, system and services for the engine valves produced with great levels of precision and advance technology.

Our Vision

Vision is clear to reach every corner of the world to render our services for Internal Combustion Engine valves.

Our Corporate Mission

Our team and management would like to thank and present ourselves as one of the leading manufacturers and suppliers of all types of Engine Valve (Internal Combustion Engines) with a steady growth rate in the market with positive response.

QUALITY VALVES, UNCOMPROMISING PERFORMANCE

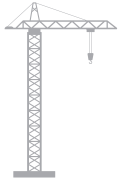

Quality speaks the truth about
the organization, which you will
notice and hear forever about
NEXTECH.

Nextech Industries Pvt. Ltd.

Regd. Office:

CRAFTED FOR EXCELLENCE, ENGINEERED FOR POWER

Quality Policy

IATF 16949-2016 certified company, Our Quality Policy reflects the expectation that all employees, at every level and in every function of the Company, are accountable for, and take ownership of quality, in pursuit of NEXTECH objective, to provide the highest level of quality to our customers. NEXTECH expects that all employees, at every level and in every function of the Company, understand and demonstrate these behaviours. We do not write and speak about quality, but we implement it in our daily procedure and work.

Cylindricity<Cyl_1> : 2.367µm

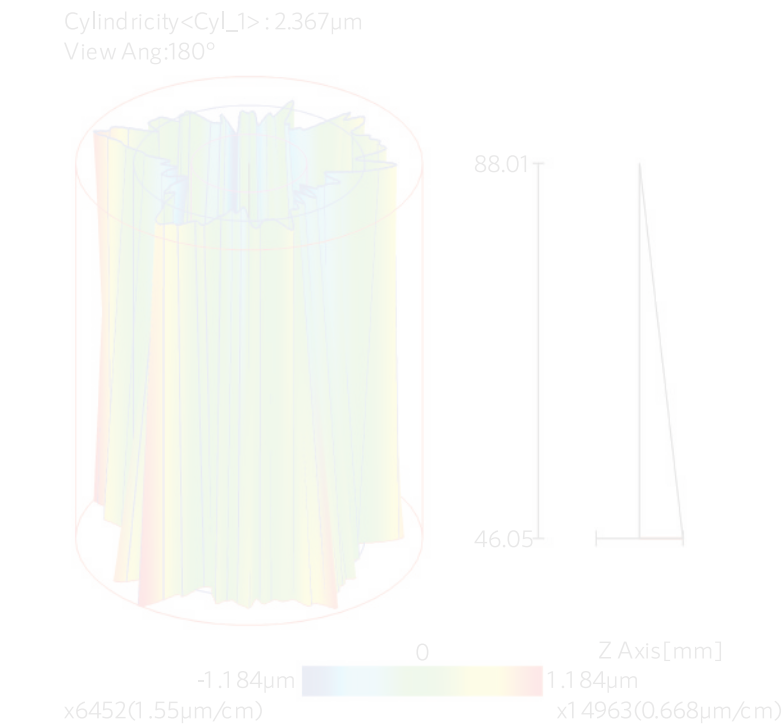

Quality Inspection & Testing

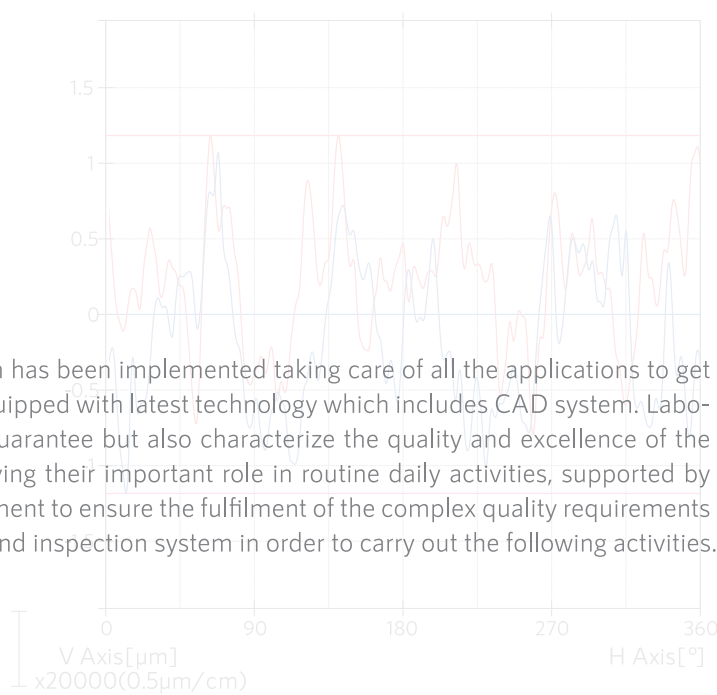

Quality is a hallmark of NEXTECH, our quality management system has been implemented taking care of all the applications to get extra ordinary results. Our R&D, with manufacturing unit are well equipped with latest technology which includes CAD system. Laboratory equipped with machinery is not only centre of control and guarantee but also characterize the quality and excellence of the products. Having professional and knowledgeable technicians, playing their important role in routine daily activities, supported by metrology lab. Using technology in control and measurement equipment to ensure the fulfilment of the complex quality requirements of our customers consequently, we count with a consistent gauges and inspection system in order to carry out the following activities.

- Gauge and maintenance of the equipment.
- Random sample check.
- Approval of the design and dimension
- Metrological and dimensional reports.

Our staff has access to all needed tools such as contour measuring instruments, form and positional measuring instruments, surface roughness tester, profile projectors, multi-measurement instruments. Our Qualified metrology staff also work parallel to achieve the best quality for NEXTECH. Our valve goes through various inspection to get 100 % result.

Cylindricity<Cyl_1> : 2.367µm

Our Principles

NEXTECH Group undertakes to satisfy our valuable customers.
The application of the Engine Valves listed with the principles.

FLEXIBILITY

To understand the market exigencies.

SHARING

Involvement of all staff members to pursue the company objectives.

COMPETENCE

Knowledge and experience at all levels.

INNOVATION

To be creative and innovative to promote the organisation's goal.

COLLABORATION

To create a relationship based on a cooperation with the suppliers.

ORGANIZATION

To obtain the desired result, managing the activities and sources as clear and focused processes.

IMPROVEMENT

To improve continuously the system through measurements and analysis.

QUALITY

To keep high level quality of the products and services.

Certificate	
Standard	IATF 16949:2016 (1st edition, 2016-10-01)
Certificate Registr. No.	01 111 2336358
IATF Certificate No.	0497862
Certificate Holder:	Nex tech Industries Private Limited Plot No. G - 2745, G.I.D.C., (Metoda), Dist.: Rajkot - 360021, Gujarat, India
IATF USI:	TE4F93
Scope:	Manufacture of Engine Valves. Excluding Product Design
Validity:	Proof has been furnished by means of an audit that the requirements of IATF 16949:2016 are met. The certificate is valid from 2024-01-25 until 2027-01-24.

Range of Engine Valves

Monometallic Valves

Valve built of a single material that forms the stem and the head. They possess excellent mechanical properties although they are not so good at corrosion. Chromium-nickel-manganese- tungsten stainless steels are used for exhaust valves.

Bimetal Valves

Valve made by joining together two different valve materials by friction welding wherein high hot hardness alloy steel (austenitic steel) is used at the head and the stem made from an upright mechanical properties steel (martensitic steel). In this way a better usage of the properties of each material is achieved, high temperature corrosion resistance in the austenitic stainless steels of the head, and high tensile strength and abrasive wear resistance in the martensitic stainless steel of the stem. This technique is used in medium to high stressed exhaust valves and in high stressed intake valves.

Projection Welded tip Valves

A small piece of martensitic steel is welded on the stem end when the entire valve is manufactured in stainless steel (non-quenchable). This is done to increase the impact and ware resistance of the stem end. Then, this tip is quenched to improve their mechanical properties.

Stellied Welded Valve (Special alloys welded onto the seat)

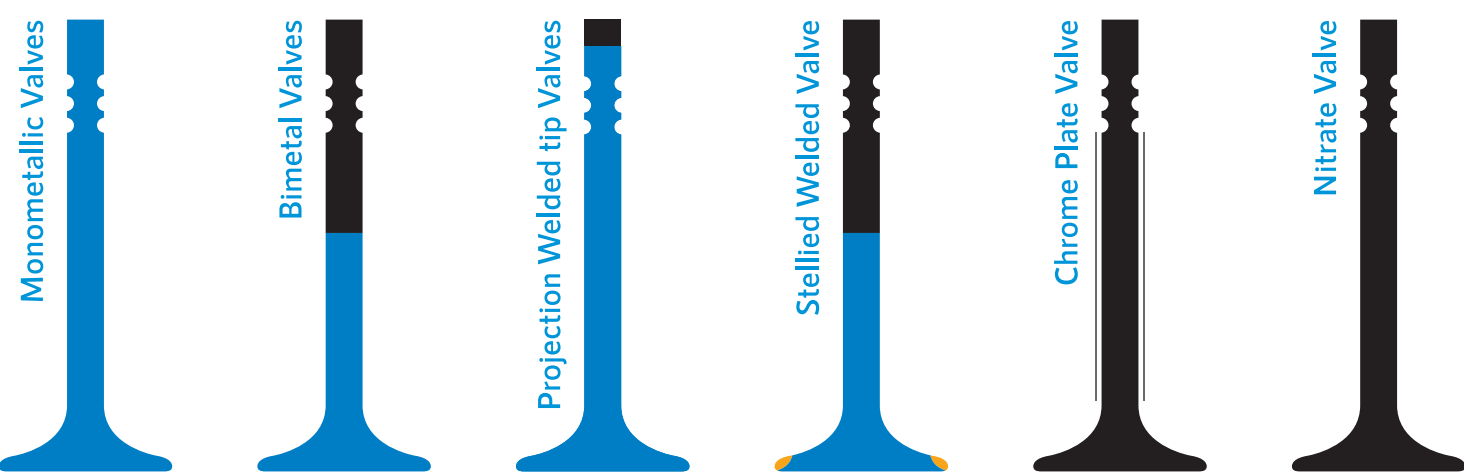

To improve the corrosion and high temperature ware resistance, mainly in exhaust valves, a cord of special material is placed onto the valve seat. Valves made by using deposit of stellite to get high hot hardness at the seat. The special material is generally a cobalt base alloy (called Stellite), although it can also be iron or nickel base.

Chrome Plate Valve

Through an electromechanical process a layer of hard chromium is stored over the stem. The thickness of this layer generally will depend on the level of the piece stress. The main function of the chromium layer is to reduce the friction between the stem and the valve guide, and to store among its micro-cracks, small amounts of lubricating oil. All this results in better operating conditions increasing. Therefore the useful life of the valve guide and stem

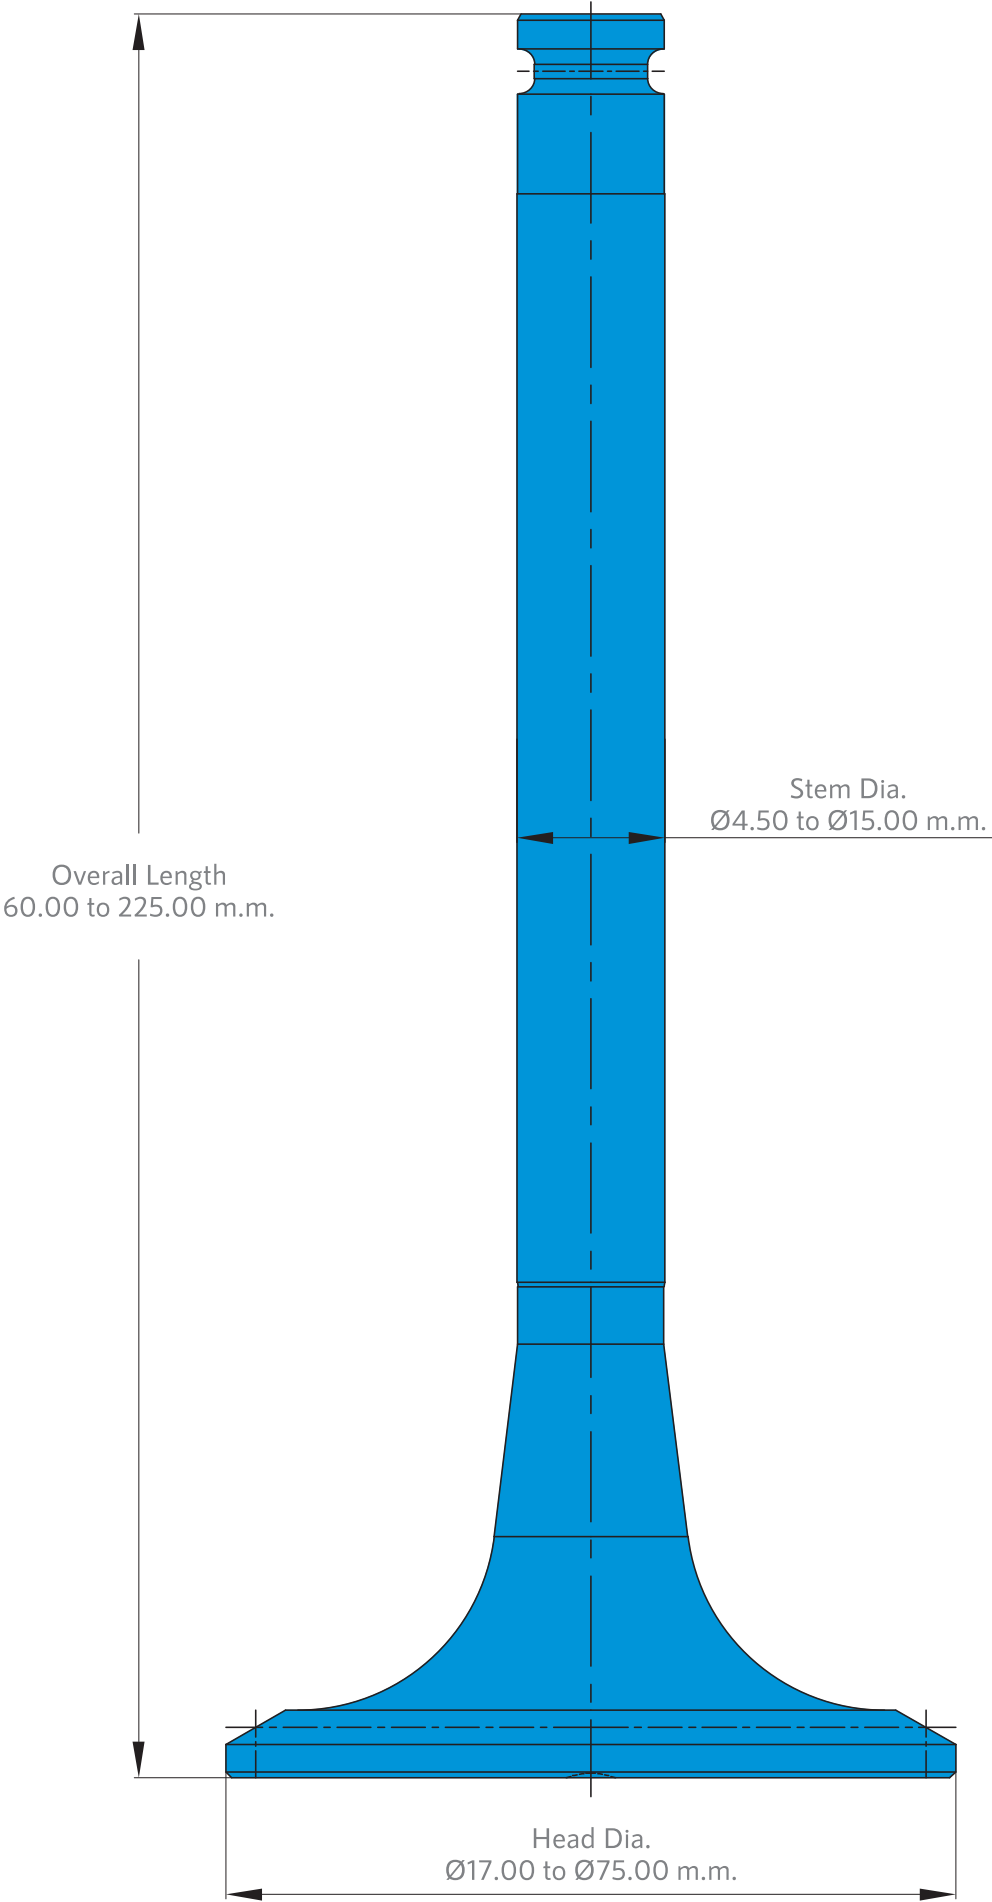

Nitrate Valve

Nitride Engine Valve with the ultimate solution for valves that are intended for use in highly corrosive environment. The Nitride coating will substantially reinforce the valve’s corrosion resistance property and enable highly durable valve performance. The tuffen Nitride Process will also provide enhancement to the valve’s ware resistance property, significantly increase the valve’s lifespan, and improve the valve stem friction coefficient to allow decreased friction between the stem and the valve guide. Nextech recommends on Nitride coating for valves that are due to perform in extremely high corrosive environment, be it for any kind of engine that outputs such conditions. The Nitride coating is presented in Grey and black colour.

Our Capability for Engine Valves

Stem Dia.- Ø4.50 to Ø15.00 m.m.
Head Dia.- Ø17.00 to Ø75.00 m.m.
Overall Length - 60.00 to 225.00 m.m.

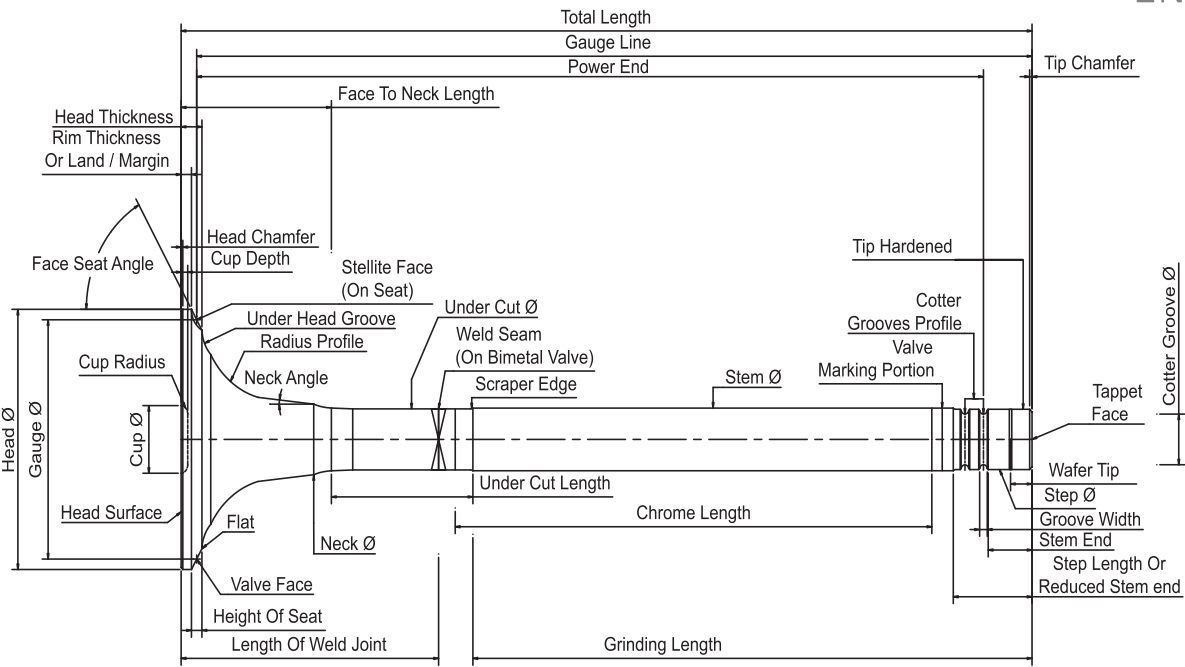

BUILT TOUGH. ENGINEERED TO EXCEL.

Signifies robust construction combined with advanced engineering, ensuring products endure harsh conditions while consistently achieving superior performance, reliability, and efficiency across demanding industrial and commercial applications.

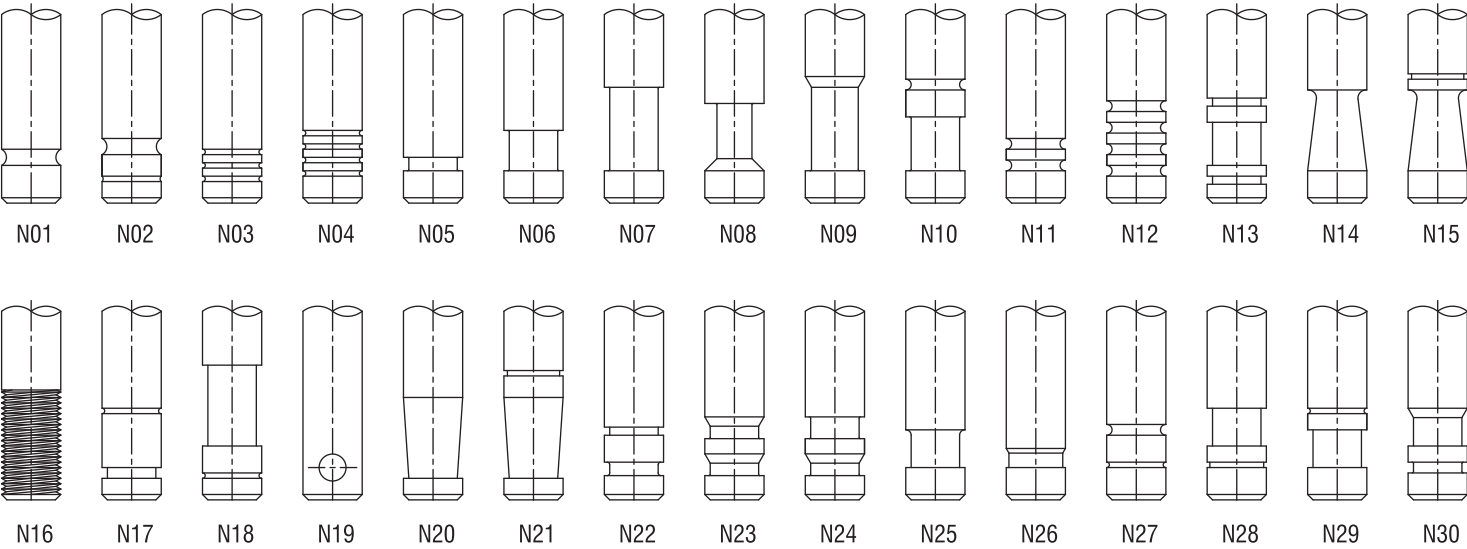

Research & Development

Research and Development is the foundation of our business through which, we apply the most creative designs and engineering, to craft new and customized products for the market for today and in future, our R&D unit take care of the following stages :

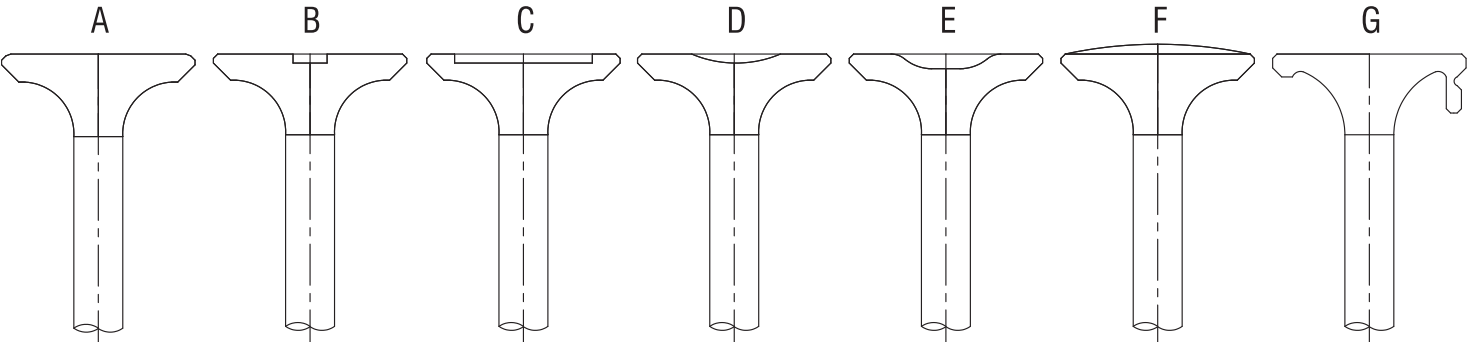

- Process control.
- Design and development of new techniques and technologies.
- Evaluation and development of new raw material.
- Ensuring and optimizing world class quality.

OEM & Aftermarket

NEXTECH stands at highest quality standard, value and best performance around the world for domestic and international market for innovative solutions in today's challenging market. Our experience, state of the art production facility which delivers precise OEM and aftermarket solutions which minimise lead time and improve quality. Our leading position in the automotive OEM business gives us the requisite platform for the local and international business. Our aftermarket products are built to OE-standards and incorporate the latest upgrades — a promise which only NEXTECH a true OE manufacturer can make.

No matter the size of the order or the complexity of the specifications, handling projects and our capability uniquely equipped to meet fast lead times offering most up-to-date manufacturing methods and technologies, along with decreased expenses and distributing inventory.

Automotive Aftermarket

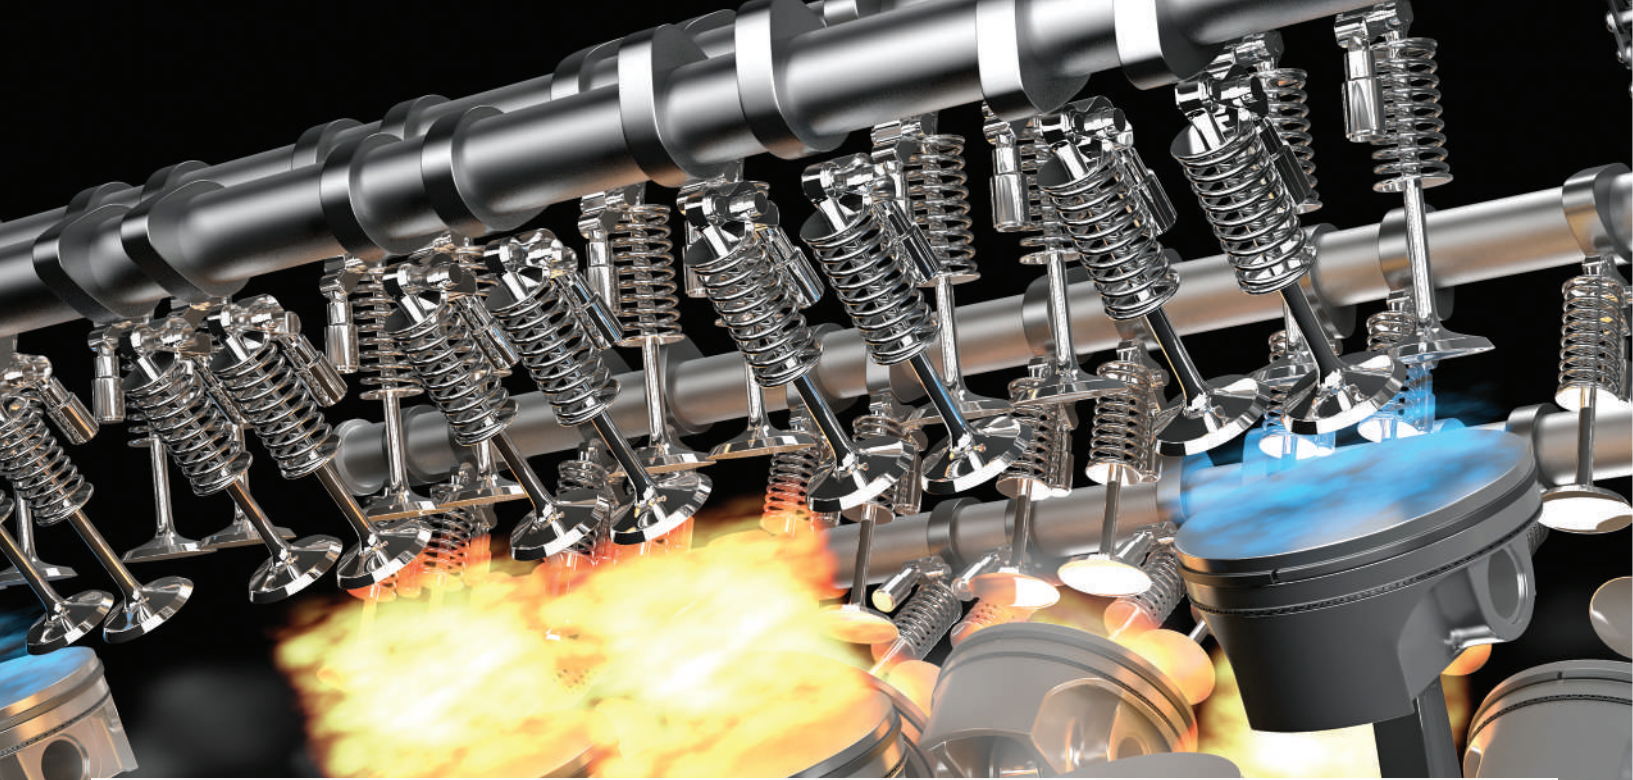

Serving for more than 18 years, NEXTECH has been recognized by customers in automotive aftermarket for being a driving force, design and delivery, innovative and high – quality, NEXTECH engine valves has constantly supplied to OEM, we ensure our customers remain aftermarket leaders. Whether for motorcycles, passenger cars, light/heavy commercial vehicles, tractors/farm equipment, earth moving equipment or marine and all major vehicle and models, the NEXTECH Valves, played an important role in the market.

Our wide range of Engine valves for internal combustion engines from **3 H.P to 4000 H.P** engines. We produce as per OEM specifications and customer's requirements, meeting its standards. We don't write names of the best brands, but we develop for them.

- Global Automotive Industry
(2 & 3 Wheelers / Passenger Cars / Multi Utility Vehicles /
Light Commercial Vehicle / Medium & Heavy Commercial Vehicles
- Tractors and Earth Moving
- Marine
- Locomotives
- Stationary and Agriculture

The requirement for precision within the automobile industry becomes clear when one considers the number of parts that should work together to build a car and to ensure, it is both safe and efficient. Hence, every Nex tech Products is tested to ensure that it meets and exceeds these high standards because it is our topmost priority that products meet the exact requirements of our customers and our industry.

Inlet and exhaust valve

Inlet (or Intake) and exhaust valves control the flow of gases into and out of an engine's combustion chamber, respectively. The inlet valve allows the air-fuel mixture in, while the exhaust valve lets out the hot exhaust gases. They are operated by a camshaft synchronized with the piston's movement, and the materials they are made from differ inlet valves use less heat-resistant materials like nickel steel, whereas exhaust valves are made from highly heat-resistant alloys due to the extreme heat from combustion.

Inlet Valve Function

- **Function**
To open and allow the fresh air or air-fuel mixture to enter the engine's cylinders.
- **Temperature:**
Experiences lower temperatures compared to the exhaust valve, as it handles the incoming air.
- **Material:**
Made from materials like Low Carbon Steel, Martensitic Valve steel, Austenitic Valve Steel, Nickel or Inconel Alloy, which are not designed to withstand extreme heat.

Exhaust Valve Function

- **Function**
To open and allow the hot, spent exhaust gases to exit the engine.
- **Temperature**
Subjected to high pressures and temperatures from combustion, reaching up to 1,000°C.
- **Material**
Constructed from heat-resistant alloys, such as silicon-chrome or cobalt-chromium, to resist the heat and pressure. Some are even hollow and filled with sodium to help dissipate heat more effectively.

How They Work Together

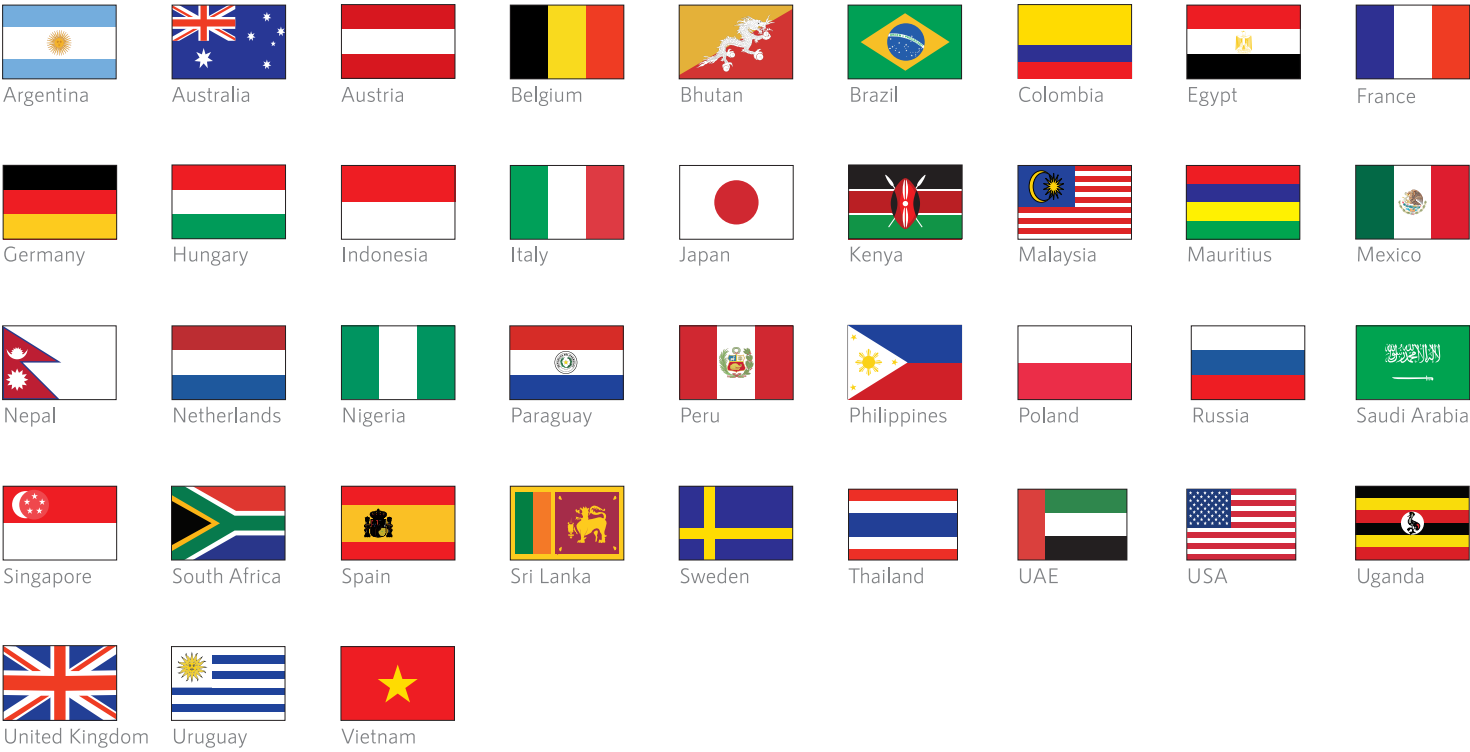

- **Camshaft Control**
A camshaft, driven by the crankshaft, controls the opening and closing of both valves.
- **Timing**
The valves open and close in precise synchrony with the piston's movement to ensure the correct sequence of intake and exhaust cycles.
- **Heat Dissipation**
Both valves dissipate heat to the cylinder head through their seats, a process crucial for engine longevity.

Importance

- **Engine Performance:**
Proper functioning of intake and exhaust valves is crucial for efficient combustion and optimal engine performance, affecting power, fuel efficiency, and emissions.
- **Durability:**
Because they are constantly in motion and subject to high pressures and temperatures, these valves are vital components that must be durable and well-maintained.

Nextech has reached many countries and has been welcome, just a glimpse, but yet still to reach many countries in coming years.
